BAIL OUT THE PEOPLE NOT THE BANKERS

The EU-IMF deal and the bail-out of the banks and bondholders are crushing our society.

The EU-IMF are demanding that ordinary people – workers, the poor, the vulnerable - pay-off the gambling debts of private banks and developers with savage cuts and austerity.

The country is being landed with astronomical debts it can't pay and this is robbing the country of the funds we need to protect services and create jobs.

The results of this economic madness are there for all to see:

- 439,571 are without work
- 170,000 have emigrated and a further 50,000 will go this year
- Health, Education, Special Needs services & public transport have been severely cut
- The Universal Social Charge, cuts to pay, rent allowance and unemployment benefit have slashed incomes to low and middle income families
- Now they are raiding our pension fund

But this is not enough for the EU/IMF. Now they are demanding:

- A sell off our state assets and natural resources
- More cuts to public services
- Cuts to pay and conditions of the lowest paid workers
- The slashing of public investment in vital infrastructure projects
- Domestic water charges & a tax on all homes.

These cuts are not only brutally unfair – they are making the economic crisis worse. The more people's incomes are cut, the less they spend and so more businesses and jobs are lost.

And our government refuses even to allow a referendum – as happened in Iceland – on whether we should sign up to this disastrous plan to bail out the bankers who caused the crisis in the first place.

They insist there is no alternative, but this is a lie.

Speculators and the super-wealthy are actually benefiting from the crisis and getting richer. The government and the EU-IMF refuse to impose taxes on the super-wealthy and refuse to allow the banking sector to be taken into full public control so it can be forced to invest in jobs and useful industry.

We need to resist this madness through people power. In Greece, Portugal and now Spain, workers, young people and pensioners are taking to the streets in protest. The people of Egypt have shown that people power can defeat corrupt and undemocratic governments.

We call on Irish citizens to take to the streets to demand real democracy, fairness, jobs and protection of the vulnerable in our society. Join the demonstration on July 16th at 2pm in Dublin, when the EU-IMF will be here in Ireland telling our government what further cuts it must impose.
